	<input type="checkbox"/> Portfolio risk management	<input checked="" type="checkbox"/> Business process improvement
	<input checked="" type="checkbox"/> Specialised risks	<input checked="" type="checkbox"/> Training and people change
	<input checked="" type="checkbox"/> Data Quality	<input checked="" type="checkbox"/> System selection and implementation

<b>The Challenge</b>	<p>The client is in the process of establishing a full service Global Treasury in Europe as a platform for growth following a recent acquisition. The Global Treasury will be created as part of the Bank to provide deposit taking and money market facilities to clients and also to undertake Treasury portfolio management and repo activities.</p> <p>The challenge is to build a robust infrastructure for regulatory reporting and capital management, finance, risk management, compliance and treasury operations in a compressed timescale.</p>
----------------------	-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------

<b>Approach and Solution</b>	<p>The particular focus for the client in advantage’s assignment is to work closely with the Head of Regulatory Reporting to deliver the FRS reporting solution for the expanded Treasury functions described above. This includes the integration of new systems, interpretation of current and future regulatory requirements, sourcing of new data requirements, addressing IFRS issues, working with the parent and the FRS vendors and also UAT testing. The role involves project management and business analysis. Global Treasury experience of various frameworks and adaptability are key to providing the client with advice and support as the Treasury strategy evolves.</p> <p>There was an initial analysis of IAS 39 requirements to address the volatility which would be introduced with the use of derivatives. An analysis of the various systems available for implementation was provided and suitable vendor demonstrations arranged for the client.</p> <p>A review of the new Capital and Liquidity Management Policies, Trading and Investment Portfolio Guidelines and Contingent Funding Plan was also provided.</p>
